Dea Della Luce

MULTI DOT SERIES

“Maximum impact with
miniature interior lighting”

JUST LET THE LIGHT PLAY THE MAIN ROLE.

Be surprised by the power of our brand-new multi dot series. These miniature luminaires have a distinct Dea Della Luce signature: stylish, versatile and there to just let light play the main role.

BUNDLED STRENGTH.

Dea Della Luce's multi dot series takes your interior lighting to an even higher level. Elegant and more compact than ever, our luminaires really deliver that magic you are looking for. Together, the dots are up to any creative lighting solution, with no multi-shadow effect. The dots team up as a duo, triple, quadruple and even as quintuple.

RECESSED, SURFACE- MOUNTED AND TRACK.

Boost your lighting plan exactly the way you like it: the multi dot series is available in recessed, surface-mounted and track 48V versions.

Choose a white or black body and add your anti-glare reflectors of choice. There are six classy color options available. Whatever combination you choose, your interior will be enriched in unprecedented ways.

A RICH RANGE OF OPTIONS.

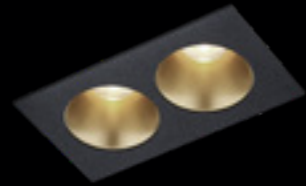

The design is not only eye-catching. It also has an extremely low glare (UGR<19). You can choose from two different beam angles (22° and 36°). The luminaires are very energy-saving with an output of 2.1W, up to 170lm each dot. And the basic parameters? We offer a high CRI 90+ as a standard and a color spectrum of 2700K, 3000K or 4000K with dimming options (Phase-Cut and/or DALI).

DESIGNED FOR CONNOISSEURS.

The multi dot series is specially designed for places where the most exclusive lighting is required: bars, boutiques, galleries, restaurants, classic retail and private luxury houses. The extra low glare also makes them great for luxury offices and hotel rooms.
