

PREPARATION:

- Read the manual before installation carefully to guarantee the correct and safe operation of the luminaire.
- The luminaires should be clicked into the correct 48V track. The luminaire must not be modified. Modifying the luminaire in any way invalidates the guarantee of conformity with standards and directives in force and it could make the actual luminaire hazardous.
- Before connecting the 48V Luminaire to the track rail please make sure that there is a compatible AC/DC converter installed, the amount of 48V luminaires depends on the power provided by the AC/DC converter.
- Never cover the luminaire during use. Luminaires classified for indoor use must never be used outdoors even if they are protected from the elements.
- The adapter of the Q-Line series 48V track system is orientation free.

PLEASE NOTE: Installation must be done by qualified trained personnel!

Touching the LED can result in permanent damage of the light source. The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

A discharge of static electricity may damage sensitive components. Always be properly grounded when touching leads or circuitry inside the luminaire. Use a wrist strap connected by a ground cord to the housing. Avoid touching the light source with bare hands.
